

Sodium Valproate (BP,EP)

General Properties

Physical form and appearance White to almost white powder, crystalline, hygroscopic powder

Physical state solid

Form powder

Molecular weight 166.2

Molecular formula $C_8H_{15}NaO_2$

Identification Infrared absorption spectrophotometry

Solubility Very soluble in water, freely soluble in ethanol 96%

Storage Preserve in an airtight containers.

International nonproprietary name (INN)
Sodium valproate

IUPAC name
sodium;2-propylpentanoate

Cas registry No.
1069-66-5

indication
Antiepileptic

structure
